

LOWER LOS ANGELES RIVER REVITALIZATION PLAN (LLARRP)

WORKING GROUP MEETING #10

Thursday, February 2, 2016 ♦ 6:00 pm – 9:00 pm
Veterans Park, 6662 Loveland Street, Bell Gardens, CA 90201

S U M M A R Y R E P O R T

INTRODUCTION

On February 2, 2017, California State Assembly Speaker Anthony Rendon of the 63rd Assembly District and the Rivers and Mountain Conservancy (RMC) co-hosted the tenth meeting of the Working Group for the Lower Los Angeles River Revitalization Plan (LLARRP). The purpose of the meeting was to identify potential issues and opportunities associated with specific sites along the Lower Los Angeles River.

Meeting Format and Agenda

The tenth meeting of the Working Group occurred on February 2, 2017, from 6:00 p.m. to 9:00 p.m. at Veterans Park, 6662 Loveland Street, Bell Gardens. Approximately 24 representatives and 25 community members participated in the meeting (Attachment B).

Mark Stanley, Executive Officer of the RMC opened the meeting by welcoming attendees and explaining the purpose and objectives of the meeting. This meeting was hosted by the City of Bell Gardens and Working Group Member, Councilmember Pedro Aceituno. Mr. Aceituno also welcomed the attendees and introduced special guests from the City of Bell Gardens and Mayor Jose Mendoza. Mayor Mendoza thanked the participants for visiting the Bell Gardens, noting the City's unique location between the Lower LA River and the Rio Hondo, and the importance of revitalizing river to the Bell Gardens community.

Mark Stanley then introduced Daniel Iacofano of MIG, Inc., who served as meeting facilitator and provided an overview of the agenda (Attachment A) and meeting format before asking for self-introductions from all participants. Mr. Iacofano included PowerPoint slides to support review of agenda items and discussion points (Attachment C). After reviewing upcoming meetings and agendas for the Working Group's Plan Element and River Segment Committees, Mr. Iacofano invited meeting participants to join small groups for an interactive mapping exercise and discussions.

SUMMARY OF SMALL GROUP DISCUSSIONS

Participants mapped issues and opportunities at the following sites along the Lower L.A. River:

- I-710/Atlantic Boulevard
- Rio Hondo Confluence
- Compton Creek Confluence
- River Estuary

Participants joined a small group corresponding to the site of their choice. Each group was briefed on the site's context and existing conditions by a project team member, and participants also added their insights about the context. Participants then discussed issues, opportunities, and possibilities for the future of each site while facilitators recorded comments on sheets of flip chart paper and large maps.

Representatives from each small group reported back to the full Working Group on major issues and opportunities as noted on flip chart pages and large maps. Andy Pendoley of MIG recorded key points on a large sheet of wallgraphic paper (Attachment D). The following sections provide a summary of overarching themes, detailed discussion points from each small group, and photo-reduced copies of the maps.

Overarching Themes

Following are overarching themes of issues and opportunities from all small group discussions.

Issues

- Insufficient trail maintenance
- Limited crossings
- Poor air, soil and water quality
- Numerous industrial land uses
- Poor connectivity
- Lack of open space

Opportunities

- Develop multi-use pathways
- Use public art as a beautification tool
- Restore natural habitat
- Improve soil and water quality
- Create opportunities for recreation activities
- Improve aesthetics with trees and gateways
- Provide amenities such as shade and seating

I-710/Atlantic Boulevard

Issues

- Excessive trash along power easement
- Insufficient connectivity
 - Residents of Maywood and Vernon cannot easily access recreation spaces located across the River from their communities
 - Slauson bridge is too narrow to accommodate pedestrians or people riding bikes
 - Traffic congestion along Atlantic Boulevard creates a dangerous pedestrian environment
- Lack of shade and greenery along existing trails
- Open space adjacent to the I-710 freeway is problematic for public health

Opportunities

- Create a designated path for pedestrians and people riding bikes
- Consider adding a steel-frame extension to the Slauson Bridge for pedestrian access
- Expand wetlands to improve wildlife habitat
- Coordinate with existing traffic mitigation projects in Vernon, particularly along Atlantic Boulevard
- Develop job trails between Slauson, Atlantic, and Washington Boulevards
- Create murals along bike path
- Add trees along District Boulevard bike path to increase shade
- Implement best management practices for runoff and soil remediation
- Consider upstream remediation to improve industrial and dry weather runoff
- Develop multi-use paths
- Improve bike access within the community through paths, lights, and bi-lingual signage
- Improve walkability and pedestrian access points
- Use vacant lot for wildlife habitat, wetlands and terracing along the right of way
- Consider park opportunities at “Frog Spot”
- Improve in-channel access

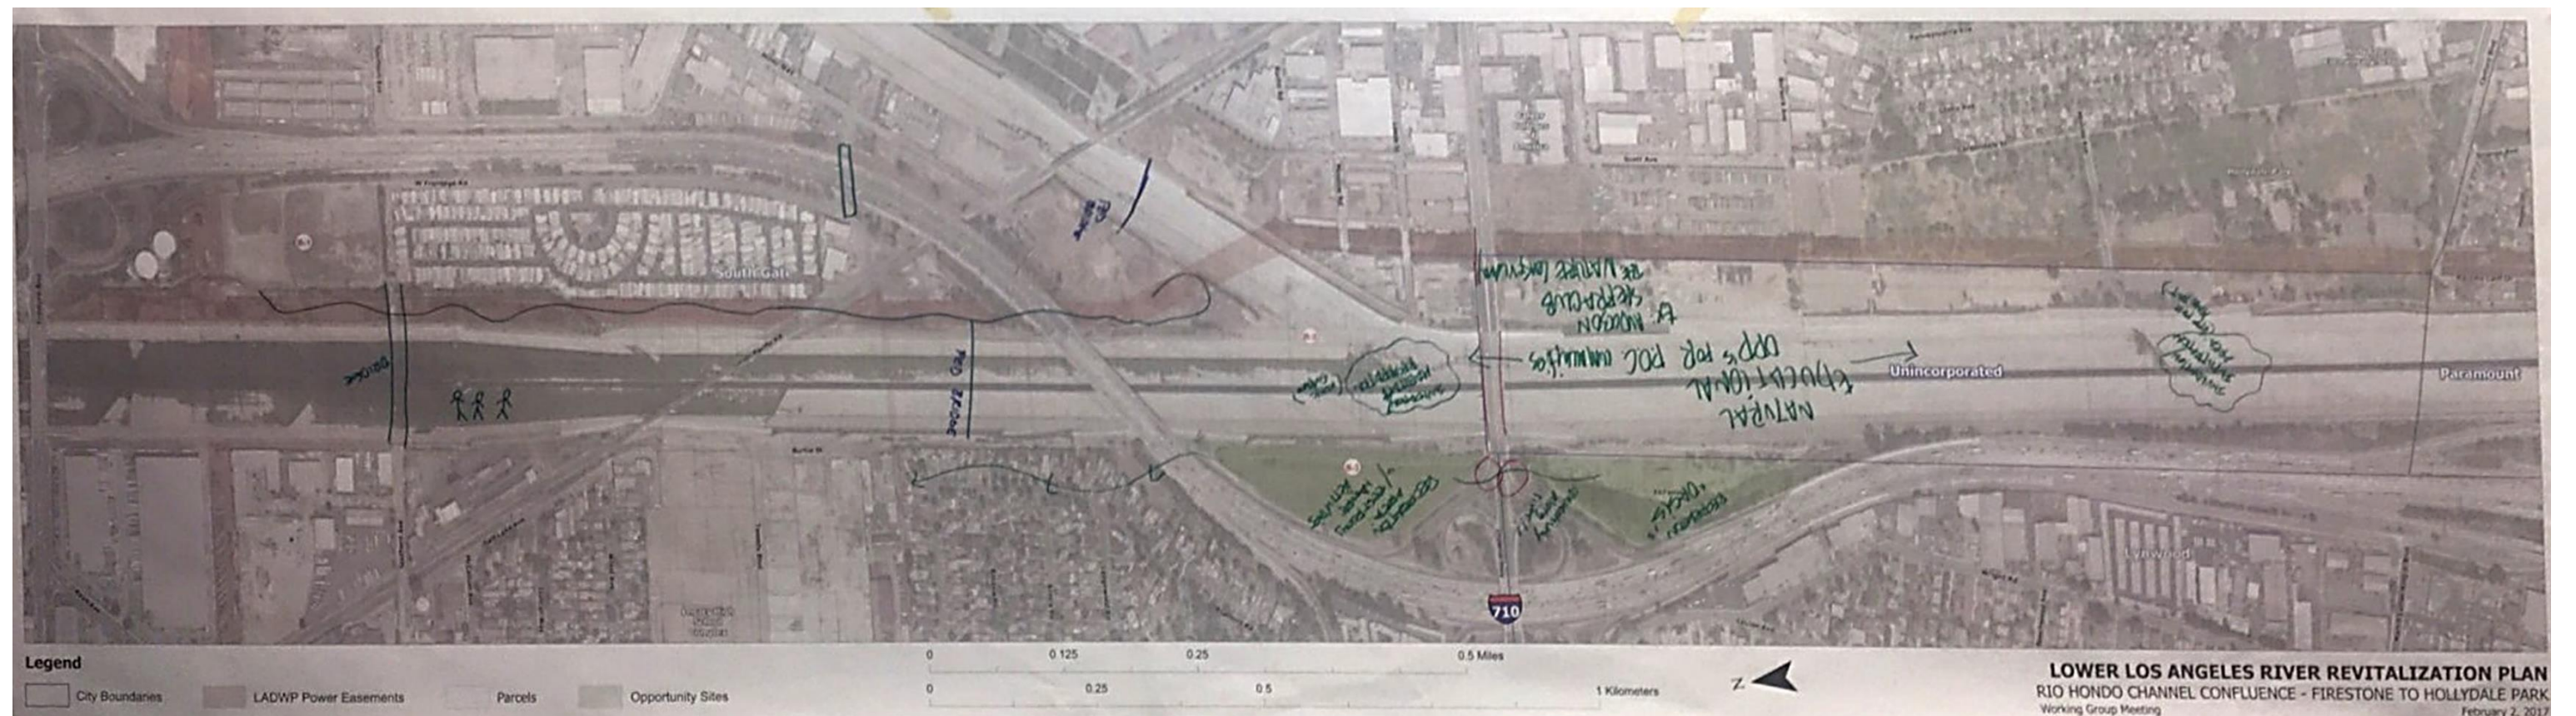

Rio Hondo Confluence

Issues

- Fenced off LADWP easements are a barrier to river access
- Connectivity is an issue at Imperial Highway
- Railroad crossing
- Area lacks art and culture amenities
 - Native American History
 - Education
- The river is not designed as an amenity which creates a safety risk for recreational users
- Lack of community outreach and community involvement in institutions
- Lack of regular maintenance
- Lack of security and safety
- Lack of signage
- Narrow crossings
- Poor connectivity of multi-use trail
- Lack of restrooms
- Poor access to parking at Orchard
- Unequal access for all groups
- Long-term maintenance for future revitalized areas

Opportunities

- Include youth in the planning process
- Connect proposed school to river
 - Consider creating a multi-use facility
- Create a centerpiece for recreation, art and habitat at the confluence
- Develop wetlands where the confluence meets the freeway
- Create a habitat island
- Construct bridges to connect East and West banks
 - Ensure crossings are wide enough for all users (multi-use)
- Consider opportunities to create an inundation area at LACFCD Yard
- Support seasonal recreation, including kayak and paddle boat
- Promote habitat restoration
- Study affordable housing needs if large development is considered
- Create activity sites: playgrounds, nature centers, amphitheater, and oases/anchors
- Develop web-based and traditional programs (e.g., BIBA) to keep people engaged
- Improve signage
- Consider opportunities at Circle Park
- Develop open space north of Railroad Bridge
- Expand river bottom access and dry weather crossings
- Curate art along the rail line to attract attention

LOWER LOS ANGELES RIVER REVITALIZATION PLAN
RIO HONDO CONFLUENCE
FEBRUARY 2, 2017

Compton Creek Confluence

Issues

- Insufficient river crossings
- Fast water flow is unsafe
- Poor aesthetics
- Lack of open space
- Insufficient greenery
- Poor air and soil quality
- Difficulty of land acquisition

Opportunities

- Improve neighborhood access
 - Trails and crossings
 - Active areas
 - River
 - Youth access
- Support habitat and landscape restoration
 - Protect wildlife
 - Consider environmental impacts
 - Improve aesthetics
 - Develop gateways
- Expand amenities
 - Seating
 - Signage
 - Art and culture
 - Interactive features
 - Rest areas
 - Overlook and viewing areas
- Utilize the hardscape
 - Low flow crossings
 - Play opportunities in the River

River Estuary

Issues

- Poor connectivity through the neighborhoods to access the river
- Huge volumes of contaminants flow to Estuary, particularly related to upstream industrial, rainfall, and brackish water
- Safety issues associated with poor soil quality and moving contaminated soil

Opportunities

- Support habitat restoration along the stream
- Develop trail network on De Forest Ave
- Improve signage and navigation
- Capture and treat runoff
- Develop upstream enhancements to improve water quality downstream
- Identify plant and marine species that can naturally filter water
- Develop wetlands (preferably saltwater) near D3 and D4 sites (West 16th Street)
- Access existing soil quality data from Council on Watershed Health and the SCCWRP
- Support coastal prairie and other underrepresented ecosystems
- Develop a birding area near site D2
- Consider a multi-purpose bridge at Hill St.

PRESENTATION: COMMUNITY ENGAGEMENT UPDATE

Mr. Pendoley provided an update on the progress of community engagement tasks related to project branding and development of an online mapping tool. The Community Engagement Committee is directing the project team on developing a compelling brand for the Lower LA River revitalization that will reflect the comprehensive nature of the work and honor the diverse communities in the region. A final version will be shared with the Working Group at the next meeting.

Mr. Pendoley also provided a demonstration of the online mapping tool that will be used to gather community feedback moving forward. Once developed, the interactive, web-based questionnaire will allow participants to comment on their preferences for specific locations along the River.

NEXT STEPS

Mr. Iacofano concluded the meeting by thanking Working Group members, and confirming among representatives of specific cities that the next three meetings would occur on the dates at the following locations:

- Thursday, March 2, 2017, Compton
- Thursday, April 6, 2017, Long Beach/Bixby Knolls
- Thursday, May 4, 2017, Downey

ATTACHMENT A: AGENDA

LOWER LOS ANGELES RIVER REVITALIZATION PLAN (LLARRP) WORKING GROUP PROJECT MEETING No. 10

Thursday, February 2, 2017
6:00 pm - 8:30 pm

Veterans Park, Ross Hall
6662 Loveland Street, Bell Gardens, CA 90201

Meeting Objectives:

1. Review status and next steps for Committees
2. Identify preferences and priorities for design elements at opportunity sites
3. Review latest developments in community engagement: branding and online questionnaire designs and community presentations
4. Coordinate upcoming meetings

2/8/2017

Next Plan Element Committee Meetings - February 2017

Committee	Objective
Community Economics, Health, and Equity	Finalize Criteria and Prioritization and Identify Areas of Need
Community Engagement	Community Engagement Plan, Branding, and Watershed Education Program
Public Realm	Finalize Criteria and Prioritization and Identify Areas of Need
Water And Environment	Finalize Criteria and Prioritization and Identify Areas of Need
Implementation	Evaluate Policies, Funding Strategies, and Program Needs

LLARRP Working Group Meeting #10
February 2, 2017 | 5

Next River Segment Committee Meetings - March 2017

River Segment Committee	Objective
Vernon to Rio Hondo	Evaluate opportunity sites along the project study area
Rio Hondo to Compton Creek	
Compton Creek to LA River Outlet	

2/8/2017

Discussion Objectives

- Understand the current context and conditions of key sites:
 - I-710/Atlantic
 - Rio Hondo Confluence
 - Compton Creek Confluence
 - Estuary
- Review and refine issues and opportunities
- Identify possibilities for the future
- Report to full Working Group

Figure 1. Lower Los Angeles River Revitalization Study Area

February 2, 2017 | 8

2/8/2017

2/8/2017

2/8/2017

Discussion Framework

- Site overview--issues and opportunities:
 - Land uses and buildings
 - Habitat
 - Water quality and supply
 - Connectivity
 - Parks and recreation
 - Art and culture
- Discussion questions:
 - *What are additional issues for this site?*
 - *What are additional opportunities for this site?*
 - *What are the possibilities for capitalizing on the opportunities?*
 - *What would be most appropriate for the site?*

Update: Branding

Purpose
Establish a compelling brand for the Lower LA River revitalization that reflects the comprehensive nature of the work and honors the diverse communities in the region.

Goals
Educate: Teach people about the Plan
Engage: Get people excited about the Plan
Motivate: Inspire people to get involved
Act: Offer people ways to take action

February 2, 2017 | 15

2/8/2017

Update: Branding

Key Principles

- Community:** Establish a sense of place and connection
- Inclusivity:** Ensure that the Plan embraces all people
- Ecology:** Respect the natural environment
- History:** Honor the rich traditions of the region
- Opportunity:** Show the Plan's potential!

LLARRP Working Group Meeting #10 February 2, 2017 | 17

Update: Branding

Audiences

- The Public:** The people who live, work and play near the River—families, seniors, singles, teachers, students, workers, etc.
- Influential Partners:** Elected officials, advocacy groups, community organizations, businesses, agencies, etc., who can help inform the public about the Revitalization efforts.

LLARRP Working Group Meeting #10 February 2, 2017 | 19

Update: Online Community Mapping

Purpose

Engage the community in defining the issues and potential improvements for the Lower LA River.

Objectives

- Understand how the community uses the Lower LA River
- Collect community input on potential improvements to specific locations on the Lower LA River

LLARRP Working Group Meeting #10 February 2, 2017 | 20

2/8/2017

Update: Online Community Mapping

Live Demonstration

LLARRP Working Group Meeting #10 February 2, 2017 | 21

Update: Community Presentations

Purpose
Build community awareness of the LLARRP through informational presentations to community organizations

Target Audiences
Elected officials
Community and neighborhood organizations
Interested recreational users

Schedule
February – April 2017

LLARRP Working Group Meeting #10 February 2, 2017 | 22

2/8/2017

Meeting Schedule

- First Thursday of each month
- 6:00 p.m. to 9:00 p.m.
- Through February 2018
- Next meetings:
 - Thursday, March 2, 2017, Compton
 - Thursday, April 6, 2017, Long Beach/Bixby Knolls
 - Thursday, May 4, 2017, Downey
 - Thursday, June 1, 2017, ???
